

GIDON PEEPER

About me

With both a theoretical foundation from my coursework and hands-on experience applying LLMs in my research at the Princeton Neuroscience Institute and the Cognitive AI lab in Amsterdam, I am motivated to use AI in a deliberate and effective way. I am excited to join ambitious, curious, intellectually driven teams whose feedback challenges me to think more critically and execute at a high bar.

What I hope to find is a position where I can not only further develop technically, but where I can also leverage my social skills. Furthermore, I enjoy analyzing complex problems from multiple perspectives, which, along with my experience as a teacher and leader of student initiatives, helps me communicate outcomes with stakeholders from different backgrounds.
